

## MOTON SPEED CLEANER - SC - 606

SERIE  
600

### Productdescription

**MOTON SPEED CLEANER** is the latest development in the field of fuel-system cleaners. Developed to meet the most recent environmental standards, MOTON SPEED CLEANER rapidly and thoroughly dissolves resin, gum, carbon and similar deposits in the fuel system, the exhaust gas oxysensor and the catalytic converter. MOTON SPEED CLEANER is suitable for both gasoline / L.P.G. and diesel engines (also TDI and Common Rail Diesel Injection Systems), and is also very easy to use.

### Application areas

Moton Speed Cleaner can be added to all fuelsystems both gasoline/L.P.G. and diesel.

### Cleans ● maintains ● protects

- ✓ multi-purpose fuel additive for both gasoline / L.P.G.- and diesel engines.
- ✓ cleans the system rapidly and effectively from harmful deposits.
- ✓ decreases harmful waste products from the exhaust gas.
- ✓ improves the performance.

### Directions for use

- can be used in all kinds of gasoline / L.P.G- and diesel engines with or without turbo in all kinds of personal cars and lorries.
- pour the entire bottle in the fuel tank.
- the product is most effective when it is used immediately before an oilchange.
- before the oilchange drive at least 15 minutes.
- after the oilchange it is recommended to use our ceramic oiladditive KA-105.
- application of both products (speed cleaner and ceramic additive) optimizes the performance, also from older cars.
- the ceramic additive takes care of a excellent engine protection, decreases the fuel consumption and improves the performance.
