

## MOTON TL 500

SERIE  
500

### Product description

**MOTON TECHNO LUBE 500** is a high quality, universal lubricant with very long-lasting cleaning and protecting properties. The product contains in addition to corrosion-preventing and water-repellant components also microscopic solid lubricating particles. The carefully proven combination of the solid lubricating particles in combination with the other components gives the product a very high Extreme Pressure and an extremely longlasting lubricating property.

### Application area

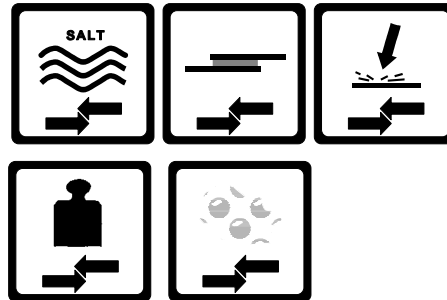

For the maintenance, protection and lubrication of:

- ▣ installations and tools in plants, factories
- ▣ tools
- ▣ hinges
- ▣ all kinds of connections
- ▣ bearings
- ▣ cables
- ▣ chains
- ▣ frees rusted bolts and nuts.

### Application

For optimal function clean the parts first and then apply the product. If possible, allow the product some time for better penetration.

### Features

### Advantages

- ▣ product withstands moisture
- ▣ excellent corrosion prevention
- ▣ Repels water and preserves
- ▣ reduces wear
- ▣ minimal adhesion of dust
- ▣ lubricates extra because of the solid lubricating particles.
- ▣ gives a very strong lubrication film
- ▣ very strong penetrating properties

### Delivery

400 ml aerosols (A-500-400), 5 (TL-500-005) and 10 (TL-500-010) litre cans, 60 (TL-500-060) litre drums.

color	neutral
components	mineral oil, solvents, additives, solid lubricating particles
density	ca. 0,85
viscosity	liquid
thermal stability	good
thermal application	-28°C - +70/150°C after evaporation of the solvent
